

Camp Campbell Jun 26 thru July 3, 2020

Special Covid Permission Slip to be used in conjunction with our regular troop permission slip.

1. Scout families are asked to review this safety plan and authorize their son's attendance specifically addressing our precautions and our covid procedures. This is the agreement.
2. Scouts and Scouters are asked not to attend if they are sick. They must be fever free for at least 72 hours prior to the start of camp AND have improved symptoms for at least 72 hours AND at least seven days have passed since symptoms first appeared to attend.
3. We will have a temporal thermometer to be used before and during camp.
4. Scouts concerned with close transportation considerations may transport to camp in private vehicles. Scouts should not arrive to camp before 2 pm on Friday.
5. Scouts and Scouters will have their temperature checked both prior to departure to camp and at least daily while the Scouts and Scouters are at camp. A screening station will be set up to perform a symptom check prior to the Scout/Scouter joining the traveling population.
6. A log will be kept recording these screenings.
7. Scouts that exhibit fevers (CDC guidance is 100.4F) or other COVID-like symptoms should be isolated from the other campers and a parent will be called to pick their child up ASAP.
8. Scouters that exhibit fevers or other COVID-like symptoms will self-isolate from other campers and Scouters until transportation arrangements can be made.
9. All common areas will be thoroughly disinfected.
10. High-touch areas (doorknobs/handles, tools, etc.) will be disinfected multiple times throughout the day.
11. Social distancing in groups, such as merit badge classes, will be strictly enforced. If social distancing cannot be maintained, masks will be worn.
12. Scouts should plan to bring multiple masks; they do not need to be disposable. Masks should be changed when they become moist or dirty. Your scout will have a means to wash their mask and cloths with a manual clothes washer.
13. Scouts will be reminded to keep hydrated.
14. Scouts should sleep in their own tents. Only siblings may share a tent. IF a Scout is using a hammock, there should be 12 feet between hammocks.
15. Cleaning and disinfecting protocols will be followed per CDC recommended guidelines for camps.
16. The troop will be using disposable serving products as a special precaution for this trip.
17. At a minimum, Scouts and Scouters will wash their hands with soap and water each morning, before and after every meal, after transitioning from activities, or using the restroom. Soap and water will be available. Hand sanitizer and sanitizing wipes will also be available.

I understand the situation and risks related to Covid and the precautions that are being taken by our troop. I have explained to my son the importance of following these directives and understand and agree to take full responsibility by allowing my son to participate.
